Profile

I am a 14+ years of experienced professional in business-critical application like Core Banking solution, online banking solution (Internet banking, Mobile app), trade finance etc. Significantly, I have experiences of working as a database administrator and a software developer. I am highly skilled in Oracle database, Linux, SQL, PL/SQL, Java and software architecture. With varied experience, I bring customer handling, application maintenance, team leading abilities and organizational growth. I would like to improve myself constantly and eager to flourish my career in a large organization where I will have the scope to prove all my innovative and intellectual qualities in achieving the objective of the organization.
